PROFESSIONAL PROFILE

Computer Engineer with experience in software development, implementation of management systems, and optimization of operational processes. I possess expertise in web development, databases, automation, and AI applied to business environments. I have developed digital tools to improve information organization, facilitate activity tracking, and streamline operational tasks—including an AI-based solution that helped save approximately 6 hours of work per week. I am distinguished by my analytical skills, problem-solving abilities, and adaptability to new technologies.

PROFESSIONAL EXPERIENCE

RENSER ORIENTE C.A. Apr 2026 - Oct 2026

Systems and Information Technology Analyst

- I developed an artificial intelligence agent to assist laboratory staff with document drafting and management, automating part of the process and helping to save approximately 6 hours of work per week.
- Implemented tools such as Trello and Kawak to improve task organization, interdepartmental communication, and process visibility for management, thereby reducing reliance on operational meetings that typically lasted around two hours.
- Designed and developed an IT inventory management system to centralize the control of resources and documentation, streamlining information retrieval, requests, and internal procedures.
- Provided technical support to various departments, performed preventive and corrective maintenance on IT equipment, and assisted in the preparation of training certificates and staff identification cards.

ALCALDÍA DEL MUNICIPIO LAGUNILLAS Jan 2025 - Apr 2025

Computer Engineer - Interships

- I developed an activity management system for various departments, facilitating real-time task tracking and improving the organization of internal processes.
- Provided technical assistance to various departments and collaborated on the maintenance of computer equipment to help ensure its proper functioning.

TECHNICAL SKILLS

- Web Programming and Development: React, Node.js, Express, Tailwind CSS, JavaScript & PHP.
- Automation and AI: n8n, OpenClaw, ChatGPT & Claude.
- Integration, development, and testing: REST API Integration, Git & Jest.

HIGHLIGHTED PERSONAL PROJECTS

DEVSNAP – CV CREATOR

React

A web application designed to help developers create resumes tailored to the hiring processes of tech companies, making it easier to showcase their professional profiles. Available here.

TYPEME

JavaScript

A gamified web application that allows users to practice and improve their typing skills through an interactive experience; available in Spanish and English.

EDUCATION

INGENIERO DE COMPUTACIÓN Jul 2021 - Apr 2025

Universidad Alonso de Ojeda, Edo. Zulia, Venezuela.
